

# N-dimensional Tic Tac Toe, and Adventure in Modules

Alex Grasley

Jeff Young

Michael McGirr

## **1 Introduction**

## **2 Overview of Project**

## **3 Program description**

## **4 Design Decisions**

### **4.1 Creating an Abstract Game Engine**

### **4.2 Higher Ordered Signatures, and the “Include” incantation**

### **4.3 Separation of IO, or How I learned to not fight SML in search of Purity**

### **4.4 You can do it in 2-dimensions, but can you do it in n-dimensions!**

### **4.5 The Functor is love, the Functor is life**
